FireFinder™ **Fire Alarm Panel**

FireFinder™ is the product of extensive customer research and feedback—a user-friendly system that puts the operator in control. **FireFinder™** operates with world-reknown Apollo XP95 products, features on-site programmability, allows users to have remote access via a modem if required and utilises the unique **LineManager™** software.

FireFinder™ has been designed not just for today, but for the future and incorporates many features which can be enhanced over the life of the system if and when required.

"Our aim is to provide 'Consistently Excellent Service' in the eyes of our customers"
