

REMOTE INDICATORS

For conventional or analogue application

PDS209-0001-2-1

Description

Ampac has a range of remote indicators that would suit most applications. Most versions provide visual indication only for detectors in concealed areas. These type of indicators come in two (2) styles, the round version and in single gang plate format. Remote indicators are fitted with five (5) mm LED's. Ten (10) mm LED's for the single gang type.

There are two (2) versions of remote indicators that incorporate audible indication. Both versions adopt a single gang plate housing. One version has an audible and visual indicator. The other has both plus a mute function.
