

PROJECT SNAPSHOT

APARTMENT

THE MELBOURNIAN

FireFinder™

OVERVIEW

The Melburnian apartments are located in the heart of Melbourne's St. Kilda Road. The Penthouse apartment was recently sold for over AUD\$5M, which makes it one of the most expensive apartments sold in Melbourne.

The apartments are spread over 2 towers, the main building being the East/West tower, which comprises of 24 levels of apartments and a 2 level underground car park. The other building is the Garden Tower, which comprises of a 10 level tower and an underground car park.

SYSTEM SUMMARY (East/West Tower)

The system comprises of a **FireFinder™** with 4 loops, 32 relay outputs, 4 x 1668 controls and a variety of XP95 detectors and devices.

SITE SPECIFIC CHALLENGES

The supply of equipment was very critical, as the installation was staged so that tenancies could be occupied.

The ability to have on site programming was required to ensure the staged dead lines were met.

SITE SPECIFIC SOLUTIONS

The equipment for the project was supplied directly from the local Ampac office.

ConfigManager was used by the installer to fine-tune the system's program.

INSTALLER'S STATEMENT

"The ability to do our own changes to the configuration allowed us to complete the project in a timely manner".

Paul Pickard – Altaire Servicing

SPECIFICATION

Panels / Network Nodes	1
Loops	4
Relay Outputs	32
Fire Fan Controls	4
LCD Repeater Panels	0
Detectors	131
Devices	189
Sounders / Speakers	1
Door Holders	0
Detector Model	XP95
