

PROJECT SNAPSHOT

HOTELS

CREST

EV3000

OVERVIEW

The Crest Hotel is located in Kings Cross, Sydney. It consists of a 15 storey tower providing 226 rooms and 3 levels of underground car park. Facilities include a Relaxation Centre, Gymnasium and Guest Laundry.

SYSTEM SUMMARY

The **EV3000** Emergency Warning and Intercom System (EWIS) consists of a 29u cabinet with 20 EWS zones, 22 EIS zones, 32 FIP inputs and 8 visual outputs.

SITE SPECIFIC CHALLENGES

The EV3000 had to be installed with minimum disruption to the operation of the hotel. The hotel rooms were occupied during the installation of the EWIS system with the new wiring being installed via the existing conduits in the slab.

SITE SPECIFIC SOLUTIONS

A staged delivery was arranged to streamline the installation process.

The programming of the system was configured such that it would allow the installation to be carried out with minimum disruption to the hotel.

INSTALLER'S STATEMENT

"The **EV3000** was installed without any problems and is a very simple system to operate."

Kris Tocker – Superior Fire Services

SPECIFICATION
